The Best Camp in Nashville

By Lexa (Teepee)

The one reason Whippoorwill isn't the best camp in Nashville is because it isn't in Nashville, it's in Fairview. Other than that, it's awesome. So the camp theme song should say: "The best camp in Fairview." Whippoorwill is awesome because there is at least one activity for everyone. There's farming, water activities, arts/crafts, and field games/sports. I think it's impossible for someone to hate Whippoorwill.

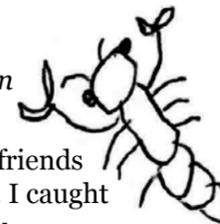

Bear Cubs Newsflash!

During 1st period creekplay on Thursday, Bear Cub campers caught 102 crawdads! See page 2 of this newspaper for a full listing of Bear Cub numbers of crawdads, fish, and salamanders.

My First Day at Camp

On the first day of camp I made friends and we caught a lot of crawdads. I caught the biggest one. I had a great day.

Kayaking By Avery (Log Cabin)

In the first period of the third week I signed up for kayaking. I had never done it before I got in my kayak. Someone pushed me in. I paddled but I paddled into the grassy, marshy pond bushes. The lifeguard grabbed his life saving thingy and tried to push me out. Then he told me to paddle backwards. What? I didn't get that at all. I finally got out when I grabbed onto the life saver.

Leadership Challenge Service Project at Graceworks

On Thursday, Leadership Challenge campers volunteered at GraceWorks in Franklin. GraceWorks provides family support, instructional programs, and a food pantry.

Is the Whippoorwill Monster Real?

Article and drawing by John Paul (Teepee)

Recent campers have had doubts on the Whippoorwill monster because of recent interviews with fellow campers, such as Leo, "I do not believe he is real, he lives in an outhouse!" Well, I think it is a mystery but we all learned a lesson. His house? Is an outhouse.

Log Cabin wins the Magic Broom Award for Session 3 - congratulations!!

Interview with Counselor Will

(landfished all 5 periods)

By Oliver

Why is it called land fishing? So, usually, fish live in water. But sometimes, they grow legs for scientifically undisclosed reasons. When this occurs, these legged creatures begin to roam around camp grounds. Using creekplay nets, pepperonies, and severed sporks, the bravest campers attempt to capture these beasts in the activity known as land fishing.

What is your favorite land fishing technique? When a "landfish" is spotted in the branches of a tree, as they commonly are when they're trying to hide, I'll strategically and accurately launch a Bear Cub (or an objectively small Log Cabiner) into the tree using my raw strength I've built up from years of professional landfishing to retrieve the aforementioned target.

How do the Bear Cubs get down from the tree? No comment.
